Popular Water Cycle Test Questions and How to Answer Them

To help you prepare

effectively, here are some of the most common high school test questions related to the water cycle, along with detailed explanations on how to approach them.

Q1: Describe the main processes involved in the water cycle.
How to Answer: Begin by listing the core processes: evaporation, transpiration, condensation, precipitation, collection, infiltration, and runoff. Then, explain each process briefly, illustrating how they connect to form a continuous cycle. Use clear, concise language and include examples where possible.

Q2: What role does the Sun play in the water cycle?
How to Answer: Highlight that the Sun provides the energy necessary for evaporation and transpiration, driving the movement of water from Earth's surface to the atmosphere. Emphasize that without solar energy, the cycle would slow or stop.

Q3: How does temperature influence the rate of evaporation?
